

Example Slides with Video

Giampiero Salvi

March 22, 2019

Motivation

- ▶ this presentation was created to test the multimedia capabilities of PDF viewers
- ▶ it uses the beamer class with the multimedia package

Usage

you should:

- ▶ move to the slide with video content
- ▶ start the video
- ▶ then move to next or previous slide while the video is playing

Expected vs Problematic behaviour

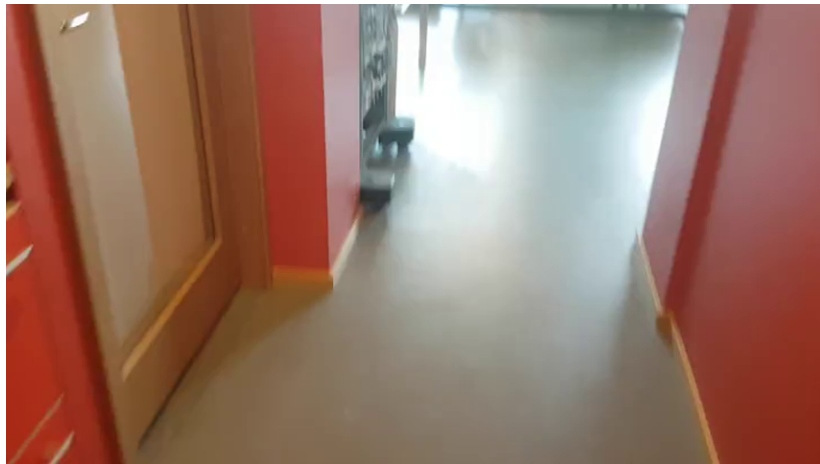

Expected:

- ▶ when changing slides the video should stop
- ▶ ... and the video frame should disappear

Evince behaviour:

- ▶ the video continues playing
- ▶ and the video frame covers all slide content

Here is the video content

First extra slide for testing

- ▶ this content is probably not visible

Second extra slide for testing

- ▶ this content is probably not visible

Third extra slide for testing

- ▶ this content is probably not visible
